Define Problem Statements (Customer Problem Statement Template):

A problem statement is written from the customer's point of view so the team can empathize with the people the project serves and uncover the real challenge the solution needs to solve

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A government policy analyst	identify regions or countries with low human development	manually analyzing dozens of socio-economic indicators is	I don't have a quick, reliable way to classify regions at	frustrated and overwhelmed

		so I can prioritize aid and policy efforts	slow and requires statistical expertise	scale	
PS-2	an NGO program manager	quickly understand a country's human developme nt level from the indicators I already track	I don't have an in-house data science team to build prediction models	the available reports only show past index values, not predictions	uncertain about funding decisions
PS-3	a student / researcher	understand which socio-econ omic factors most influence a country's developme nt level	existing public reports show only the final HDI score, not an explanation	there is no interactive tool that lets me test 'what-if' scenarios	curious but unsatisfied
