

Demonstration of Proposed Features

Date	15 March 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Data Preprocessing & Cleaning	Load HDI.csv, handle missing values, convert GNI per capita to numeric, and encode categorical columns (Country, HUMAN DEVELOPMENT).	Implemented	Yes	Handled in model.py before training.
2	Random Forest Model Training	Train a RandomForestClassifier on the cleaned dataset and evaluate accuracy using a train-test split.	Implemented	Yes	Model saved as model.pkl using joblib.
3	HDI Category Prediction	Accept user-submitted country indicators via the /predict route and return the predicted Human Development category.	Implemented	Yes	Supports Low, Medium, High, and Very High categories.
4	Home Page	Landing page (home.html) introducing the HDI Predictor application to users.	Implemented	Yes	Provides navigation to the prediction form.
5	Prediction Input Form	Form page (indexnew.html) where users enter the numeric indicators required for prediction.	Implemented	Yes	Submits form data to the /predict route.
6	Result Display Page	Results page (resultnew.html) that displays the predicted category or a clear error message if input processing fails.	Implemented	Yes	Includes error handling for invalid inputs.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
