Customer Journey Map

The map below traces the user's experience stage by stage as they use the HDI prediction web app — capturing their actions, touchpoints, thoughts and feelings, along with who owns each stage and where it can be improved.

Phase of Journey	Stage 1: Discover the Tool	Stage 2: Enter Data & Predict	Stage 3: Review the Result
Actions What does the customer do?	- Hears about / is directed to the app - Opens the home page - Reads what the tool predicts	- Opens the Prediction page - Enters indicator values into the form - Submits the form for a prediction	- Views the predicted HDI category - Compares it with their own expectations - Decides what to do with the result
Touchpoint What part of the service do they interact with?	- Home page (home.html) "Go to Prediction" navigation link	- Prediction form page (indexnew.html) - POST /predict route	Result page (resultnew.html)
Customer Thought What is the customer thinking?	"What exactly does this tool predict?" "Is this trustworthy enough to use?"	"Am I entering values in the right order/units?" "Will it warn me if I make a mistake?"	"Does this match what I expected?" "What should I do with this result?"
Customer Feeling What is the customer feeling?	- Curious - Mildly skeptical	- Slightly anxious about accuracy - Hopeful	- Satisfied, if the result is clear - Confused, if an error message appears
Process Ownership Who is in the lead on this?	Frontend / UX Team	ML & Backend Team	ML & Backend Team + Frontend Team
Opportunities How can we improve this stage?	- Add a short "How it works" explainer - List the indicators that will be needed	- Add input validation with field units/tooltips - Show inline errors instead of a blank/odd form	- Show a confidence score with the category - Explain in one line what the category means
