Maximum Marks	2 Marks

Data Flow Diagram

The Data Flow Diagram (DFD) below shows how data moves through the HDI prediction system — between the external user, the processing steps, and the stored model.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data (e.g., the User submitting indicator values).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Input, Predict HDI Category).
Rectangle (no number)	Data Store	A place where data is held for later use (e.g., the trained model file, model.pkl).
Labeled arrow	Data Flow	The movement of data between entities, processes and data stores, labeled with what is being passed.

Example: HDI Prediction Data Flow

The diagram below shows how a user's input travels through the Flask app to produce a prediction.
